

Two years of service. One expanded mandate.

How dependable AMC/CAMC delivery earned D-TECH a new 12-month FMS engagement at ADAMA India's Dahej facility.

AMC → CAMC RENEWAL → FMS

A practical story of continuity, responsiveness and earned trust.

EXECUTIVE SNAPSHOT

Reliable service became the case for a broader partnership.

A concise view of the relationship, verified service scope and the new FMS mandate.

FMS engagement

THE OUTCOME

Performance established confidence. Confidence expanded scope.

D-TECH now supports the relationship across installed security and communication systems plus a dedicated FMS engineer for day-to-day IT support.

*Relationship duration is based on D-TECH's business record; the attached 2026-27 order confirms the current CAMC renewal.

Keep plant support dependable while the technology footprint grows.

Industrial operations require availability, clear ownership and fast restoration—not fragmented support.

01 Operational continuity

CCTV, access control, public address, systems support, day-to-day operations.

02 Multiples systems

Different **Differ**ologies and logics devit field devices are coordinated/coordinated by service owner.

03 Prescription de discipline

Issues must be attended quickly with integrity, with predictable escalation and parts restoration.

04 Site Off-site and Demand

Growing day-to-day requirements call for a dedicated engineer and structured FMS governance.

RELATIONSHIP JOURNEY

Service consistency created a natural path from AMC to FMS.

The engagement grew in stages—each step supported by delivery confidence.

TRUST SIGNAL

The FMS order converts proven service performance into a broader, embedded support responsibility.

CAMC COVERAGE

One service framework across five plant technology systems.

Current coverage period: 01 February 2026 to 31 January 2027.

01

CCTV

Cameras, NVR and HDD

05

ENTRY

Boom barriers

CAMC COVERAGE

Single-window coordination reduces ambiguity across field devices, recording, access, communication and entry-control assets.

SERVICE COMMITMENTS

Clear response targets turn support into a dependable operating rhythm.

Documented commitments create transparency for users, IT stakeholders and service teams.

≤ 24h

Complaint attendance

Service request acknowledgement, triage and attendance within the agreed window.

≤ 48h

CAMC parts replacement

Covered replacement parts targeted within the documented restoration window.

4x / year

Quarterly governance

Commercial and service cadence aligned to quarterly invoicing and review.

OPERATING PRINCIPLE

Log → classify → attend → restore → validate → close

SOLUTION ARCHITECTURE

A practical support model connecting plant systems to accountable service.

Illustrative connectivity view based on the documented CAMC scope.

EXPANDED MANDATE

A dedicated FMS engineer for day-to-day IT support.

The new 12-month engagement extends D-TECH from asset support into embedded operational assistance.

12

MONTHS

Dedicated FMS engagement

ADAMA India • Dahej, Gujarat

01

Daily support

User assistance, routine checks and first-line issue handling.

02

Ownership

A visible on-site point of coordination for day-to-day IT needs.

03

Escalation

Structured hand-off to D-TECH specialists and OEM channels.

04

Reporting

Service visibility through logs, status and review cadence.

FMS GOVERNANCE

A simple cadence for visibility, accountability and improvement.

Final activities and SLA measures remain aligned to the mutually agreed operating SOP.

BUSINESS IMPACT

A support relationship designed around plant continuity.

Value is created through dependable execution—not isolated product supply.

Continuity

Responsive support across critical security, communication and entry systems.

Accountability

A single service partner with clear ownership from ticket to closure.

Visibility

Documented response targets, service records and review cadence.

Scalability

An embedded FMS layer that can absorb growing day-to-day IT demand.

Confidence

Two years of AMC experience translated into a broader service mandate.

Lifecycle focus

Ongoing insight into asset condition, recurring issues and future priorities.

DOCUMENTED MILESTONES

Two current orders demonstrate continuity and expansion.

Commercial values are intentionally excluded from this external-sharing case study.
