

HOSPITALITY IT OPERATIONS | FMS + AMC + INFRASTRUCTURE

Keeping Regenta and the NHP Group Connected, Secure and Guest-Ready

D-TECH combined dedicated on-site resources, group-wide IT consultancy and a multi-system infrastructure modernization into one accountable support programme.

ON-SITE FMS	DEDICATED TEAM	GROUP COVERAGE	INFRASTRUCTURE
12 Months	2 Resources	5 Companies	30 PO Lines

DOCUMENTED ENGAGEMENT | MAY-JULY 2025

Three verified orders | Commercial values omitted for confidentiality

THREE CONNECTED WORKSTREAMS

A Unified Service Model for Hospitality and Group Operations

The documents show a deliberate progression: establish on-site capability, extend support across associated businesses, then strengthen the hotel technology foundation.

THE OPERATING PRINCIPLE

One team manages the operational layer, the AMC connects the wider group, and the infrastructure programme strengthens the underlying technology estate.

Result: clearer accountability across people, platforms and support continuity.

DEDICATED SUPPORT AT THE HOTEL

Two-Tier On-Site Coverage for Daily IT Continuity

The FMS order establishes two dedicated support roles for 12 months at Regenta Central Harimangla, with hardware and software work included.

**L1 FMS Engineer**

Primary technical resource for incident handling, user support, system checks, troubleshooting, coordination and escalation across the hotel IT environment.

**FMS Technician**

Hands-on support for endpoint, cabling, peripheral, rack and field-level issues, working under the same service and reporting structure.

OPERATING MODEL

- **One accountable D-TECH team at the Regenta Central Harimangla site**
- **Twelve-month deployment covering both hardware and software work**
- **Layered capability: L1 diagnosis plus field-level technical execution**
- **Support continuity aligned to day-to-day hospitality operations**

DOCUMENTED BASIS

PO: IT.DEPT.-2025-26/003 | Date: 24 May 2025 | Duration: 12 months
Resources: 1 L1 Engineer + 1 Technician | Coverage: Hardware and software work included

ONE SUPPORT UMBRELLA

Extending IT Consultancy Across Five Group Companies

The AMC work order expands D-TECH support beyond the hotel, creating a common IT consultancy and support relationship for associated NHP Group businesses.

DOCUMENTED AMC

Work Order: HHPL-2025-26/001 | Date: 09 June 2025 | Term: 01 June 2025 to 31 May 2026
Scope: IT consultancy and support services; hardware and software work included

THIRTY DOCUMENTED PO LINES

A Complete Hotel Technology Foundation

HOW THE ENVIRONMENT CONNECTS

One Support Layer Across the Hotel Technology Estate

A logical schematic of the documented platform. Final port maps, cable routes and device locations remain subject to site drawings and as-built records.

A DEFENSIBLE HOSPITALITY CASE STUDY

What the Combined Engagement Demonstrates

The documented scope shows D-TECH acting as an operating partner - supplying skilled people, coordinating group support and integrating multiple technology domains.

CONTINUITY

Dedicated two-tier FMS coverage creates a clear first response and technical execution model for daily hotel operations.

ACCOUNTABILITY

One partner spans support resources, group consultancy and infrastructure implementation.

CONVERGENCE

Network, Wi-Fi, CCTV, access control, voice and endpoint computing are coordinated as one estate.

SCALABILITY

The same support umbrella extends from Regenta Central Harimangla to five documented group companies.

VERIFIED DOCUMENT SET

- IT.DEPT.-2025-26/003 | 24 May 2025 | 12-month FMS engineer and technician support
- HHPL-2025-26/001 | 09 June 2025 | Group IT consultancy and support through 31 May 2026
- ENG.DEPT.-2025-26/011 | 14 July 2025 | 30-line hotel IT infrastructure order

CASE STUDY POSITIONING

D-TECH enables hospitality organizations to operate with confidence by unifying on-site people, managed support and practical infrastructure under one accountable technology relationship.
