55 DELL DESKTOPS | 1 LAPTOP | 2 PRINTERS

Documented orders: 2015, 2016 and 2022
Supply planning, deployment ownership and warranty readiness.

The engagement | Computing for an academic campus

SRICT's supplied orders show a campus computing engagement with D-TECH across three procurement years. The scope combines desktop endpoints, multifunction printing and a mobile Dell platform with docking accessories. This case study brings the ordered configuration, delivery responsibilities and warranty evidence into one customer-readable view.

Order / period	Documented quantity and specification	Delivery / warranty position
2015 | ARES/SRICT/PHASE-V/PC/14-15/PO/38	25 Dell OptiPlex 3020 MT: Core i3-4150, 4 GB DDR3, 500 GB HDD, 18.5-inch LED, keyboard / mouse. 2 HP LaserJet M1005 print / scan / copy devices.	Free installation of listed OS / applications; PC 3-year onsite parts / service; printer 1-year onsite.
17 NOV 2016 | ARES/SRICT/PHASE-V-C/ UG/2016-17/PO/18	1 Dell Latitude E5470: Core i5-6200U, 4 GB DDR4, 500 GB HDD, 14-inch anti-glare display; E-Port Plus replicator / docking station and backpack.	3-year onsite laptop warranty; battery 1 year; FOR delivery at SRICT.
02 JUN 2022 | PO 2622230027	30 Dell OptiPlex 3090: Core i5 10th / 11th generation as worded, 8 GB RAM, 512 GB SSD, 2 GB graphics, HDMI, 22-inch display, keyboard / mouse.	Installation and unloading in SRICT scope; 5-year comprehensive onsite warranty from supply; warranty document required.

The 2015 scanned date has an obscured day; February 2015 is visible. Quantities are ordered totals across years, not a claim of the current installed estate.

Reading guide: 03 Solution architecture | 04 Configuration and deployment | 05 Warranty-support process | 06 Acceptance, handover and customer details

Solution architecture | Endpoints, printing and mobility

DESKTOP COHORT | 25

Dell OptiPlex 3020 MT
Core i3 / 4 GB / 500 GB HDD
18.5-inch display; 2015 order.

DESKTOP COHORT | 30

Dell OptiPlex 3090
Core i5 / 8 GB / 512 GB SSD
2 GB graphics; 22-inch display; 2022 order.

MOBILE COMPUTING | 1

Dell Latitude E5470
14-inch display; dock / port replicator and backpack.

MULTIFUNCTION PRINTING

2 HP LaserJet M1005 units. Validate printer placement and supported local connection; no print-server licence is ordered.

CUSTOMER CAMPUS SERVICES

Existing LAN, internet, user identities and academic applications, where available. Network / server supply is not established by these POs.

DOCK / PERIPHERALS

Match laptop / dock compatibility and test approved peripherals. No extra external monitor quantity is assumed.

Solid lines: peripheral / equipment relationship. Dashed lines: conditional access to existing campus services, subject to the institution’s design.

This is a supply-led reference architecture, not an as-built LAN. No server cluster, Wi-Fi, CCTV, attendance or centralised software platform is inferred.

Deployment design | Consistent checks, distinct responsibilities

Work package	Implementation / acceptance detail	Responsibility from source
RECEIPT & ASSET CONTROL	Reconcile model, serial, CPU, RAM, disk, display, graphics and accessories against each PO. Capture delivery / warranty evidence and room allocation.	D-TECH supply documentation; institution receives and verifies.
2015 SOFTWARE SETUP	Order lists free installation of Windows 8, MS Office, PDF reader and Security Essential. Verify entitlements separately; these are historical terms, not current software recommendations.	Free installation stated in the 2015 order.
2022 DESKTOP ROLLOUT	Validate 3090 variant, processor wording, SSD capacity, display / HDMI and graphics. Institution determines licensed OS / academic applications, image and user access.	Installation and unloading expressly in SRICT scope.
PRINT / DOCK CHECKS	Verify print / scan / copy, authorised device connection and test page. Validate laptop charging, docking and available peripheral interfaces without assuming additional hardware.	Ordered equipment; test method is proposed handover practice.
CONFIGURATION RECORD	Maintain an asset-to-location sheet, software / licence register, supported configuration, warranty start date and issue log. Store credentials securely outside the case study.	Joint handover; current support terms to be confirmed.

RIGHT-SIZED TO THE ORDER

The later cohort moves from the recorded HDD / 4 GB baseline to SSD / 8 GB. This is a configuration comparison, not measured performance improvement.

CLEAR DEPLOYMENT OWNERSHIP

The 2022 purchase order is a supply engagement with institution-led installation. Any additional D-TECH deployment service requires its own approved scope.

Actual installed software, departmental allocations, commissioning results and live support entitlements have not been supplied.

Support process | From fault report to validated closure

01 | REGISTER

Capture asset / serial, location, user contact, fault time, symptoms and impact on teaching / administration.

02 | TRIAGE

Distinguish hardware, power, peripheral, OS / application or campus network issue; preserve useful evidence.

03 | VERIFY COVER

Check supply date, device-specific warranty and service route; agree access and any required approval.

04 | COORDINATE REPAIR

Route eligible faults to the entitled support provider; record diagnosis, parts, visits and dependencies.

05 | VALIDATE

User / campus IT tests the affected device, print function or dock; verify approved service restoration.

06 | CLOSE & RECORD

Document actions, acceptance, open risks and recurrence recommendations against the asset and ticket.

D-TECH customer support | support.dtechindia.com | +91 99989 03042

D-TECH value | Procurement clarity and support readiness

Delivery value	Evidence that makes it reviewable
MATCHED SUPPLY	Approved model / specification comparison, delivery challan, serial register and accessory checklist for desktops, laptop, docking and printers.
CLEAR OWNERSHIP	Installation responsibility recorded per order; institution owns the 2022 rollout. Optional service work is separated from the purchase baseline.
WARRANTY READINESS	Warranty documents and supply dates linked to each asset. Earlier warranty durations do not prove current coverage; check the actual entitlement before escalation.
CUSTOMER ACCEPTANCE	Specification check; agreed desktop / printer / dock tests; software-entitlement review; unresolved-item register and authorised sign-off.
