100+ Server & VM Multi-Location FMS Operations

Filatex Group - Plants & Offices

MONITOR | SECURE | SUPPORT | GOVERN

SERVICE PROFILE

A dedicated FMS engineering engagement for hardware, networking and server operations across Filatex plants and offices, covering enterprise security, identity, virtualisation, backup, cloud, Microsoft 365, storage and network coordination.

100+

D-TECH SOLUTION INTEGRATORS PVT. LTD.

Lead with Trust. Inspire with Vision.

THE ENGAGEMENT

One FMS operating layer across a distributed enterprise estate

Filatex requires coordinated support for server, virtualisation, security, backup, cloud, network and user infrastructure across plants and offices. D-TECH provides a dedicated FMS engineer and a structured escalation model spanning five verified locations.

100+

server and VM estate

5

cities and plant locations

contract validity

Operational requirement

DISTRIBUTED CONTROL

Support common infrastructure services across geographically separated plants and offices.

PLATFORM BREADTH

Manage identity, security, backup, virtualisation, storage, cloud, server roles and collaboration services.

USER CONTINUITY

Provide first-level help desk, personal and telephonic assistance for hardware and software issues.

VENDOR COORDINATION

Track warranty systems, replacement parts, ISP, ILL and MPLS issues through accountable follow-up.

D-TECH VALUE PROPOSITION

A single service framework connects site support, enterprise server administration, virtual-machine operations, cyber controls and third-party coordination without fragmenting ownership.

GROUP-WIDE SUPPORT FOOTPRINT

Delhi, Dahej and Surat - connected within a five-location service model

The work order explicitly extends support to Dahej, Dadra, Delhi, Surat and Mumbai. D-TECH's FMS engagement provides a common operational approach across manufacturing and office environments.

Coverage model

PRIMARY SITE PRESENCE

Dedicated engineering support anchored to Filatex operations and plant requirements.

ALL-LOCATION SUPPORT

The contract extends the service responsibility across all listed plants and offices.

CENTRAL SERVICES

Identity, security, backup, Microsoft 365 and virtualisation dependencies span multiple sites.

CONNECTIVITY ESCALATION

D-TECH coordinates with ISPs for ILL and MPLS issues affecting inter-site operations.

ENTERPRISE PLATFORM RESPONSIBILITIES

From endpoint support to server, VM and cloud administration

The ordered scope combines day-to-day infrastructure support with specialised administration across core Windows, security, backup, virtualisation, storage, application and connectivity services.

IDENTITY & CORE SERVICES

Active Directory sites/services, forest/tree, RODC/ADC replication, Group Policy, security groups, DNS and DHCP.

SERVER & VIRTUALISATION

Server health monitoring, patching, hardening, WSUS, Hyper-V lifecycle and Hyper-V replication.

CYBER SECURITY

Trend Micro Apex One, Apex Central and Deep Security, firewall operations and controlled access permissions.

BACKUP & STORAGE

Veeam Backup, Azure cloud storage, SQL backup, SAS/NAS storage, RAID and recovery-oriented monitoring.

APPLICATION SERVICES

File, FTP, print, internal mail, IIS and Microsoft 365 Exchange administration.

WORKPLACE & NETWORK

Desktops, LAN, printers, scanners, first-level help desk, ISP coordination, ILL and MPLS.

SERVICE DISCIPLINE

Monitoring | troubleshooting | configuration | add/remove/modify | health checks | SOP creation | ITIL process | repair logs

STRUCTURED SERVICE WORKFLOW

A repeatable path from alert or complaint to controlled closure

The FMS engineer acts as the operational bridge between users, infrastructure platforms, vendors, ISPs and Filatex's engineer-in-charge. The model below turns a broad technical scope into a governed daily service process.

GOVERNANCE LOOP

Health monitoring | patch governance | backup review | vendor tracking | SOP maintenance | ITIL process management | stakeholder updates

CONTROLS ACROSS THE ESTATE

Operational resilience built from layered disciplines

The scope aligns preventive administration, cyber protection, backup and replication with service processes. This creates a practical control framework for a 100+ server and VM estate distributed across multiple locations.

Governance outcomes enabled

CONFIGURATION CONTROL

Add, remove and modify operations remain tied to defined administration responsibilities.

BACKUP VISIBILITY

Veeam, SQL and Azure storage responsibilities bring multiple protection layers into the service view.

SECURITY HYGIENE

Endpoint/server security, patching and hardening are treated as continuous operational activities.

AUDIT TRAIL

SOPs, ITIL process management and repair logs improve traceability and repeatability.

VENDOR ACCOUNTABILITY

Warranty and third-party cases are tracked through restoration and status reporting.

BUSINESS CONTINUITY

Common support across locations reduces fragmented ownership of shared services.

VERIFIED WORK-ORDER FRAMEWORK

A defined enterprise FMS mandate for Filatex plants and offices

The supplied work order confirms dedicated manpower for hardware, networking and server management, a one-year contract framework and support across all listed Filatex locations. Commercial values and raw order pages are intentionally excluded.

CUSTOMER

Filatex India Limited

WORK ORDER

WOCF/000461/25-26

ORDER DATE

05 November 2025

SERVICE

FMS engineer support for hardware, networking and server systems

COVERAGE

Dahej, Dadra, Delhi, Surat and Mumbai

VALIDITY

One year from deputation of the engineer

DEPLOYMENT

Engineer to be provided within 10 days of contract signing

D-TECH ENTERPRISE FMS VALUE

One accountable partner for 100+ servers and VMs, five locations and a broad platform stack - supported through dedicated engineering, structured escalation and disciplined documentation.

Evidence note: Contract and scope details are taken from the supplied Filatex work order. No commercial order copy is appended. The 100+ server and VM estate size is provided by D-TECH management; measured SLA, uptime and ROI data were not supplied.

ONE ESTATE. MULTIPLE LOCATIONS. ONE SERVICE FRAMEWORK.
