01 | BUSINESS CONTEXT

Supporting a Distributed Pharma IT Estate

One service model across plants, offices and diverse endpoint technology

The covered environment extended across multiple Panoli units, Ankleshwar locations and the Bharuch office. It combined desktops, notebooks, dot-matrix printers, laser/MFP devices, scanners, point-of-sale printers and servers under both comprehensive and non-comprehensive service conditions.

OPERATIONAL COMPLEXITY

Multiple plants, mixed hardware generations, different coverage types and user-facing dependencies required disciplined coordination.

CONTINUITY REQUIREMENT

Standby engineers, PCs, printers, scanners and key spares were required to minimize disruption and maintain service timing.

D-TECH delivery commitment

- Four FMS engineers supporting day-to-day IT operations across the service footprint.
- Help-desk monitoring with L1, L2 and L3 escalation from site to D-TECH head office.
- Hardware troubleshooting, repair, replacement coordination and OS-level support.
- Same-business-day response target and next-business-day resolution expectation.
- Preventive maintenance, recurring-call monitoring and monthly IT review meetings.
- Standby resources and sufficient spares maintained to reduce service downtime.

FMS MANDATE

Keep pharmaceutical users productive through visible on-site ownership, structured escalation, preventive discipline and rapid restoration.

02 | INTEGRATED OPERATIONS

Four-Engineer FMS Delivery Framework

A practical support layer from help desk to field replacement

01 Resident FMS Team

Four engineers providing visible ownership, field support and coordinated site coverage.

02 Endpoint Support

Desktops, notebooks and servers supported through diagnosis, repair and OS-level assistance.

03 Print & Scan Estate

Dot-matrix, laser/MFP, Epson TMU printers and scanners maintained across business locations.

04 Standby Readiness

Standby engineer, PC, printer, scanner, display and essential service spares kept available.

05 Preventive Discipline

Half-yearly preventive maintenance, antivirus attention, backup care and asset health checks.

06 Service Governance

Daily pending-call reporting, escalation matrix, monthly reviews and repetitive-call monitoring.
