

SERVER / NETWORK / WI-FI / CONSULTANCY / IMPLEMENTATION / AMC

Connected plants. One infrastructure approach.

J.B. Chemicals & Pharmaceuticals Ltd.

From server infrastructure and fibre networking to Wi-Fi zones and ongoing maintenance: D-TECH brings design, supply, implementation and support into one coordinated engagement across the supplied Panoli and Ankleshwar locations.

UNIQUE PHARMACEUTICAL LABORATORIES
SERVER & DATA CENTRE | SITE NETWORKS | WI-FI ZONES | PLANT APPLICATIONS

CLIENT FACILITIES: PANOLI / IV-17 | ANKLESHWAR | UNIQUE PHARMACEUTICAL LABORATORIES

CONSULT & DESIGN

IMPLEMENT & INTEGRATE

MAINTAIN & SUPPORT

The requirement | Connect technology with plant needs

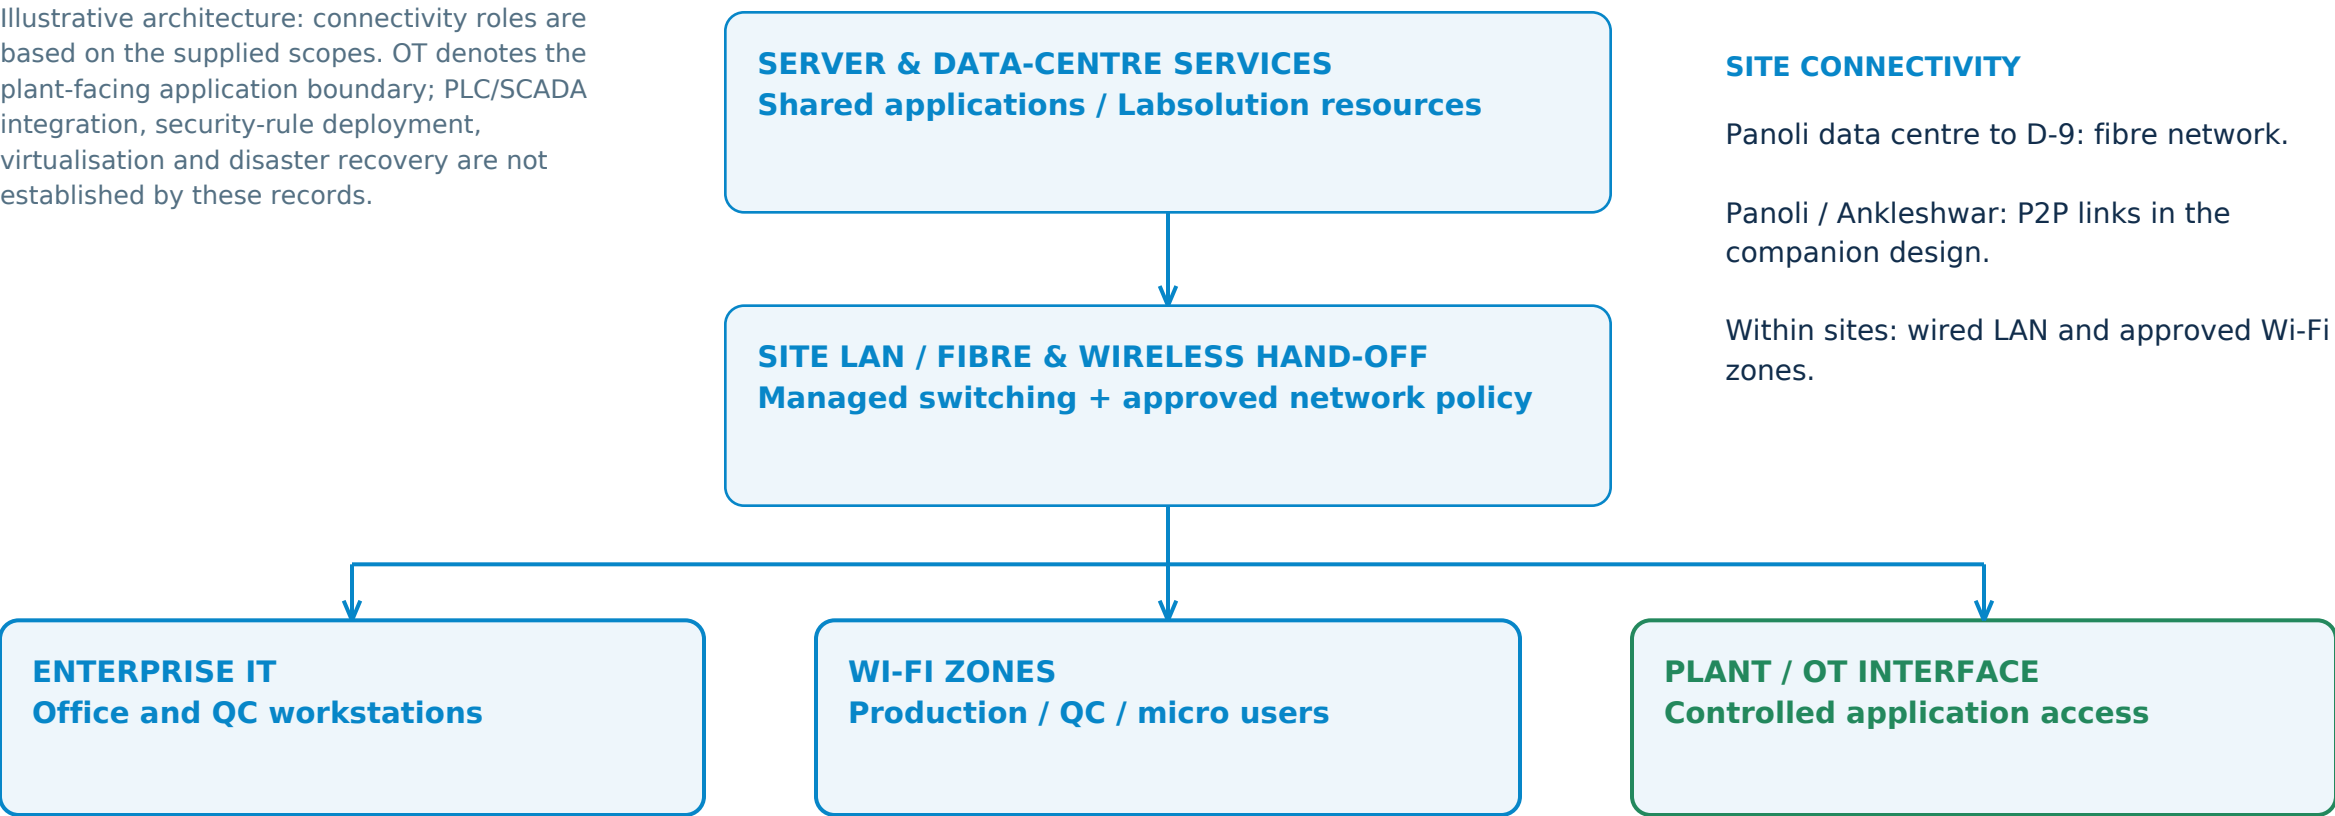

The engagement combines central IT resources, site LANs and Wi-Fi access for production and laboratory users. D-TECH’s role covers consultancy and implementation alongside equipment supply and network maintenance. The records show distinct site scopes within one wider client relationship.

Location / unit	Role in the case study
Panoli Godown / Data Centre	Central connectivity origin for the Labsolution network to D-9 IT room.
Panoli / D-9 (Unique Chemicals)	Fibre backbone, managed switches, racks and QC LIMS workstations.
Panoli / TI-10	Server and network rack; Wi-Fi for production, QC and microbiology areas.
Panoli / T-20	Non-comprehensive LAN AMC covering managed switches, wireless devices and fibre troubleshooting.
Ankleshwar / UM-12	T-30 server and UPS; inter-plant P2P connectivity covered in the companion case study.
Panoli / IV-17	Client facility photograph supplied for this case study; unit-specific equipment scope is not itemised in these POs.

Inside: integrated design - page 3 | solution portfolio - page 4 | delivery process and AMC - page 5

The design | Servers, site networks and plant access

Illustrative architecture: connectivity roles are based on the supplied scopes. OT denotes the plant-facing application boundary; PLC/SCADA integration, security-rule deployment, virtualisation and disaster recovery are not established by these records.

SITE CONNECTIVITY

Panoli data centre to D-9: fibre network.

Panoli / Ankleshwar: P2P links in the companion design.

Within sites: wired LAN and approved Wi-Fi zones.

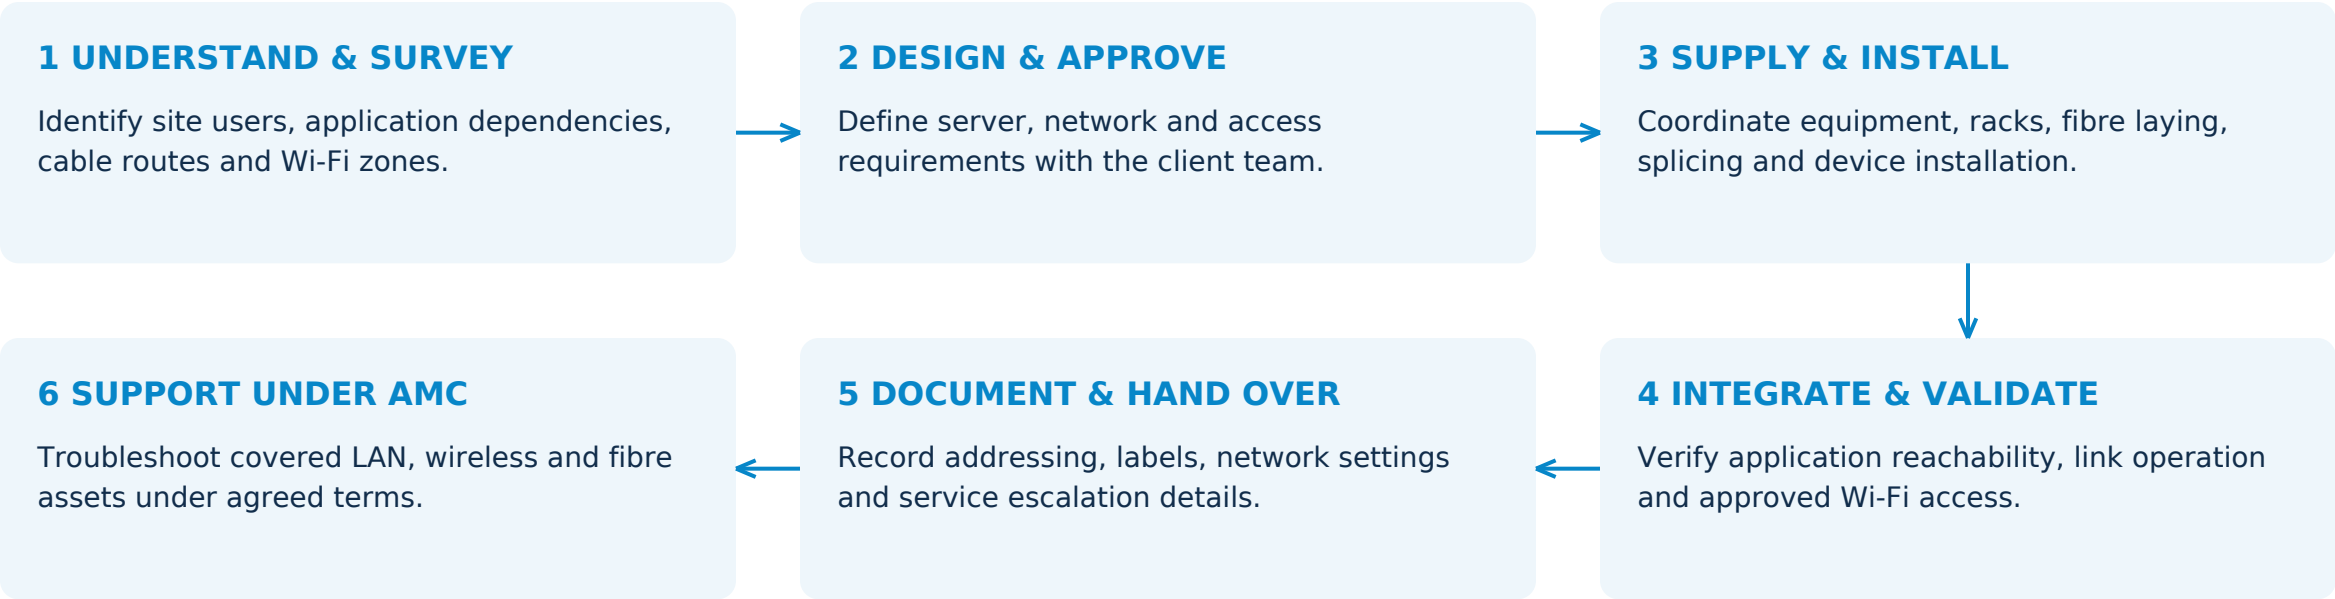

Network controls: approved VLAN / access policy, restricted management access and controlled IT-to-plant communication.

The solution | A complete infrastructure portfolio

Solution layer	Documented scope	Operational purpose
Server & power	Dell PowerEdge T30 at TI-10; T-30 server and BX1100-IN UPS at Ankleshwar UM-12.	Local compute resources and supporting power equipment.
Fibre & managed LAN	AMP/Tyco fibre and CAT6, HPE 1920 switches, SFPs and racks at D-9; D-Link 6-core fibre, LIUs and splicing for the data-centre-to-D-9 Labsolution network.	A structured path between central IT resources and plant / laboratory users.
Wi-Fi zones	Ubiquiti UniFi long-range indoor devices; 2017 PO specifically includes installation for TI-10 production, QC and micro areas.	Wireless access for the approved workplace zones.
QC / plant application endpoints	Dell OptiPlex 5070MT systems, monitors and Windows 10 Pro licences for QC LIMS 3.4 at D-9.	Endpoints to access laboratory applications over the site network.
Network AMC	Non-comprehensive LAN AMC at T-20: managed Cisco/HP/Dell switches, Cisco/Aruba/D-Link wireless devices and managed fibre troubleshooting.	A defined maintenance and troubleshooting route for network assets.

AMC scope shown is from the 01 July 2020-30 June 2021 order. Server configurations and warranties remain tied to the respective orders; current renewals and estate-wide coverage are not inferred.

The approach | Consult, implement and maintain

Client value

A coordinated delivery approach connects servers, site networks and user access. Defined AMC coverage extends maintenance responsibility after implementation; the process above describes D-TECH’s delivery model.

Sources: supplied server, network, Wi-Fi and AMC POs (2017-2021), including the two network orders in the ZIP; client facility photographs. Consultancy / integrated delivery narrative: D-TECH. Photos identify client facilities, not a unit-by-unit completion record.
