

OIL & GAS | CLIENT CASE STUDY

Modernising the LNG terminal workplace

200 new business PCs. User migration.
Managed changeover and legacy buyback.

ORDER VALUE | NOV 2022

US\$297,043

PO 4500013657 | DAHEJ, GUJARAT

Illustrative LNG image; the photograph is not identified as Dahej.

THE CLIENT REQUIREMENT

Refresh endpoints without losing working context

The Petronet LNG purchase order covers the Dahej terminal and defines the supply, migration and buyback obligations.

ALL-IN-ONE DESKTOP PCS

194

MICRO FORM FACTOR PCS

06

TOTAL NEW SYSTEMS

200

WORKING PCS FOR BUYBACK

135-150

BUSINESS CONTEXT

A terminal relies on its everyday computing tools: user files, mail, network access, printers and line-of-business applications.

The order joins new hardware with user setup, testing and responsible removal of eligible old working desktops.

READING GUIDE

- 03** Endpoint solution architecture
- 04** Migration and cutover sequence
- 05** Buyback and data controls
- 06-07** Order value and evidence

CASE STUDY BASIS

This is a purchase-order-backed account of the contracted solution. The provided files do not include delivery notes, migration logs, acceptance records or the final buyback handover. Diagrams show intended workflows.

SOLUTION DRAWING

A controlled desktop layer for an LNG terminal

Logical view of the ordered endpoint estate and the systems users must continue to reach. It is not an OT network drawing.

ORDERED DEVICE PROFILE

Intel Core i7 12th Gen 12700 series or higher; 32 GB RAM; 1 TB SSD; Windows 11 Pro; Wi-Fi 6.

All-in-one: integrated camera, wired keyboard/mouse, adjustable stand. Micro PC: wireless keyboard/mouse.

The schedule specifies five-year on-site next-business-day warranty. Final make and model are not established by the PO.

BOUNDARY

Enterprise endpoint replacement only. No change to plant controls, process safety or hazardous-area systems is documented.

IMPLEMENTATION DRAWING

Move the user, then retire the machine

The order requires data transfer, OS updates, client software configuration and operational testing.

MIGRATION CONTROL POINTS

Before swap

Confirm user scope and restore path

At desk

Transfer + configure using authorised media

At handover

User validation and issue register

PO REQUIREMENT

Systems to be operational within one month of desktop delivery.

Sequence above is a practical implementation design; site-by-site acceptance evidence was not provided.

BUYBACK SOLUTION

Keep the retirement trail as clear as the deployment trail

The PO provides for vendor pickup of old working desktops after completion, with the final list supplied by Petronet LNG.

A | FINAL ELIGIBILITY

Confirm working condition against the owner-approved list. The PO estimates 135-150 units; the final quantity depends on availability.

B | DATA RELEASE

Reconcile migrated user data and obtain permission for retirement. Record approved data-erasure or drive-handling evidence.

C | CUSTODY

Tag serials, sign handover, and log vendor collection from Dahej. Loading, unloading and transport are at vendor cost under the PO.

RECOMMENDED SECURITY AND ACCOUNTABILITY RECORD

Old asset serial + user / migration checklist + acceptance / data-clearing record or approved media handling

New asset serial + assigned user / pickup receipt + final count / exception and reconciliation log

Control design shown above is a recommendation; the PO does not prove these records were completed.

COMMERCIAL RECORD

A 200-endpoint order valued at approximately US\$297K

Purchase-order value in INR is the controlling amount. USD is an indicative translation at the order-date rate.

PO 4500013657 | 14 NOV 2022

INR 24,052,194.88

approx. US\$297,043

194 | ALL-IN-ONE PCs

INR 23,417,600.32 including GST

approx. US\$289,206

PO unit rate INR 102,296 before GST.

06 | MICRO FORM FACTOR PCs

INR 634,594.56 including GST

approx. US\$7,837

PO unit rate INR 89,632 before GST.

USD CONVERSION NOTE

Indicative historical rate: 1 USD = INR 80.972 on 14 Nov 2022 (exchange-rates.org). INR divided by 80.972;

rounded to the nearest dollar. This is an illustration for international readers, not a USD invoice or FX settlement rate.

WHY THIS MATTERS

Hardware, migration and retirement in one accountable scope

An industrial site needs a coordinated endpoint transition so users can resume their work with less disruption.

01 SUPPLY

200 ordered business PCs
across two form factors

02 MIGRATE

Files, applications, client
settings and local devices

03 RETIRE

Working legacy assets
through a controlled handover

EVIDENCE BOUNDARY

Source: Petronet LNG purchase order 4500013657, dated 14 Nov 2022, final version dated 18 Nov 2022;
Annexure B, pp. 5-12. The record establishes contracted scope and quantities. Delivery, installed make/model,
completed migrations, final buyback quantity and performance outcomes require separate acceptance records.
