

AWARDED ENGAGEMENT / 2026-2028

Enterprise FMS at India's LNG Gateway

A disciplined 24x7 onsite support model for Petronet LNG Limited's Dahej LNG Terminal.

ENGAGEMENT

20 months

ONSITE TEAM

2 engineers

COVERAGE

24x7 shifts

Fair allocation of support. Faster response. Accountable closure.

VERIFIED CONTRACT FACTS

A new enterprise support mandate, built for continuity.

The engagement combines onsite responsiveness, structured backend capability and formal plant governance.

SERVICE ORDER

4700007881

Issued 07 Sep 2026; final 11 Sep 2026

DELIVERY SITE

Dahej Terminal

Bharuch, Gujarat

CONTRACT WINDOW

01 Oct 2026

Through 31 May 2028; 20 months

DEPLOYMENT

2 × L1 FMS

24×7 rotational shift coverage

THE DELIVERY PROMISE

**Local response. Multi-level expertise.
One accountable service rhythm.**

Onsite engineers provide desktop, data-centre and help-desk support, with D-TECH's in-house L1/L2/L3 capability available for infrastructure escalation.

COMMERCIAL-SAFE PRESENTATION

This marketing edition intentionally excludes pricing, bank details, tax identifiers, signatures and other confidential contractual information.

OPERATIONAL IT SUPPORT WHERE AVAILABILITY AND DISCIPLINE MATTER

Responsive support inside a safety-led LNG terminal.

01

Continuous coverage

Rotational shifts across all days, including Sundays and national holidays, as directed by the Engineer-in-Charge.

02

Plant-ready people

Pre-approved resources, medical fitness, police verification, identity control, PPE and safety compliance before deployment.

03

Technical breadth

Desktop, client software, mail, LAN/WAN, peripherals, servers, networking, security systems and data-centre environment.

04

Service continuity

Approved backup pool and replacement discipline to sustain authorized coverage during absence or leave.

“The strongest FMS model is a controlled operating system around the onsite engineer.”

D-TECH ENGAGEMENT PRINCIPLE

THREE SERVICE LANES, ONE ONSITE OPERATING MODEL

User support, data-centre operations and service-desk control.

The contracted scope connects daily user productivity with controlled infrastructure support and documented escalation.

DESKTOP SUPPORT

- OS and client-software installation, configuration and reloading
- Email, Internet, LAN/WAN, VPN and application availability
- IMAC activity, peripherals, printers, drivers and user assistance
- Asset movement and configuration records; updates and bug fixes

DATA-CENTRE SUPPORT

- Duty-hour monitoring of the data-centre environment and equipment
- Servers, switches, routers, firewall and security-equipment actions
- OEM, ISP and offsite-team liaison for faults and preventive work
- Racks, logs, SOPs, inventory, LAN/WAN diagrams and MIS reports

HELP-DESK & CONTROL

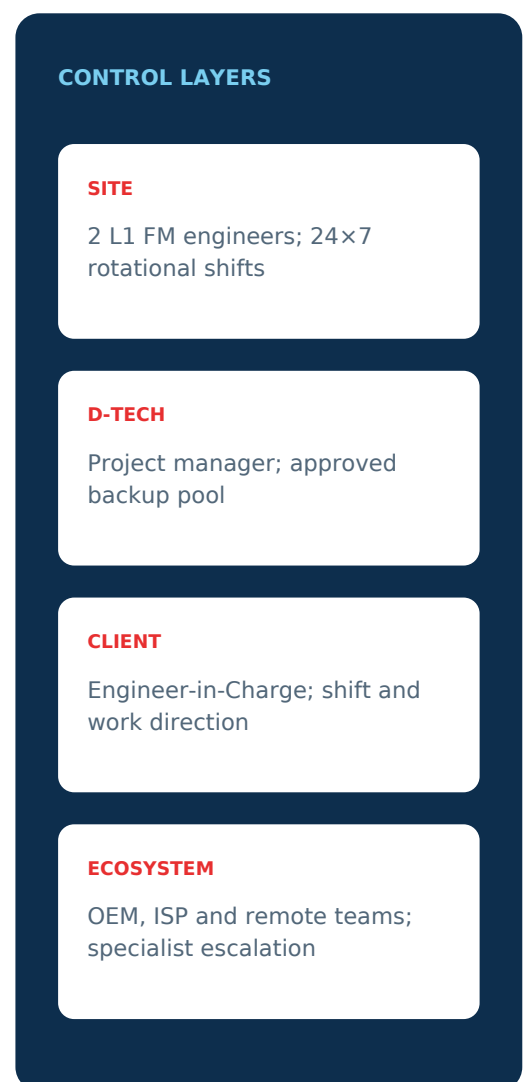

- User issue intake, diagnosis, restoration and closure support
- Escalation to D-TECH's L1/L2/L3 technical organisation
- Documentation of changes, incidents and service activity
- Communication through the client's Engineer-in-Charge

CAPABILITY BEHIND THE SITE TEAM

In-house L1, L2 and L3 support for servers, operating systems, networking, backup and security systems.

DESIGNED FOR RESPONSE, ESCALATION AND ACCOUNTABLE CLOSURE

A governance structure close to users, with access to deeper expertise.

CONTINUITY SAFEGUARD

Replacement is drawn from a pre-approved engineer pool, preserving authorized personnel standards and service continuity.

A CONTROLLED PATH FROM AWARD TO OPERATIONAL READINESS

People, safety, access, support and governance at each gate.

AWARD

07 SEP 2026

Service Order 4700007881 issued

ACCEPT

48 HOURS

Formal acknowledgement and mobilisation ownership

ASSURE

≤ 30 DAYS

PBG, resource pool, records and compliance readiness

ONBOARD

PRE-GO-LIVE

Interview, credentials, medical, police, PPE and induction

GO LIVE

01 OCT 2026

24×7 rotational deployment at Dahej

DELIVER

20 MONTHS

Operations through 31 May 2028; governance and reporting

READINESS IS MORE THAN JOINING DATE

Verified capability, site access, safety compliance, approved backups and a known escalation path.

WHAT THIS AWARD DEMONSTRATES ABOUT D-TECH

A reference-ready support model for business-critical sites.

INDUSTRIAL FIT

Ability to deploy inside a governed, safety-sensitive terminal environment.

FULL-STACK SUPPORT

Onsite desktop and data-centre coverage connected to L1/L2/L3 expertise.

CONTINUITY BY DESIGN

Rotational coverage and an approved backup resource model, with authorized substitution.

AUDITABLE DELIVERY

Defined reporting, records, statutory compliance and client-led governance.
