CASE STUDY / EPIGRAL / SURVEILLANCE SERVICE & SUPPORT

Reliable surveillance. Responsive service.

EPIGRAL Limited

Dahej Plant | CCTV Annual Maintenance

A coordinated service model for camera, network, recording and playback health - from complaint logging to verified restoration and customer closure.

94 CAMERAS

4 NVRs | CCTV network care

2026-2027 AMC

01 April 2026 - 31 March 2027

Supplied corporate building photograph | PO 4506125434

Engagement | Keeping plant surveillance serviceable

EPIGRAL’s Dahej CCTV system covers operational and support areas including gates, dispatch, warehouses, offices, laboratories, canteens and control rooms. The AMC coordinates inspection, fault diagnosis, cleaning, recording checks and software support across the camera-to-viewing path, with a defined customer role for replacement hardware and site facilities.

Service component	Contract scope and service approach
Camera / network health	Inspect IP cameras, switches, displays, cables and related accessories. Troubleshoot power, image, connectivity and streaming faults by location / asset.
Recording & software	Check NVR / HDD operation, storage and recording capacity; troubleshoot playback and live view. CCTV software support is included; firmware assistance where required.
Scheduled maintenance	Quarterly camera / lens cleaning and PM of cameras, outdoor junction boxes and camera network boxes; monthly CCTV / NVR / storage health reports.
Non-comprehensive boundary	EPIGRAL provides spare hardware and materials. D-TECH diagnoses and troubleshoots covered camera, cable, switch and related hardware issues.

Order: 4506125434 dated 30 March 2026; amendment 1 dated 04 April 2026. Term: 01 April 2026 - 31 March 2027.

03 Service architecture | 04 Complaint-to-closure process | 05 Maintenance & reports | 06 Responsibilities & customer care.

ILLUSTRATIVE LOGICAL DIAGRAM / FIELD DEVICES / RECORDING & VIEWING

Service architecture | Follow the complete CCTV path

CAMERA LAYER | 94 UNITS

Gates / dispatch / plant areas
Office / laboratory / stores
Lens, view, power and connections
Location-wise channel identity

NETWORK & TRANSMISSION

Camera switch / PoE as installed
Cabling and outdoor junction boxes
Link / port / power diagnostics
Approved configuration recovery

RECORDING | 4 NVRs

NVR service / HDD health
Recording schedule and capacity
Time and representative playback
Channel mapping verification

SERVICE ENGINEER CHECK

Identify symptom -> isolate layer
Document cause and action
Retest the affected path
Keep the plant contact updated

AUTHORISED VIEWING

Customer operator live view
Recorded-video review / export
EPIGRAL owns operator activity
and client-PC maintenance

CUSTOMER-SPARES ROUTE

Identify faulty part -> request spare
EPIGRAL provides hardware
Coordinate approved replacement
Verify video and recording

Illustrative topology, not an as-built map. Annexure lists mixed camera types; reconcile asset / NVR allocation with the live register without publishing device IPs.

Complaint process | Log, diagnose, restore and close

01 | LOG COMPLAINT

Use the support portal / phone. Capture site, camera or NVR, symptom, impact and contact details.

02 | TRIAGE & RESPOND

Prioritise impact. Contract response: emergency calls same day; normal calls next business day.

03 | ATTEND & DIAGNOSE

Remote / onsite troubleshooting; onsite presence within 24 hours of complaint logging as specified.

04 | RESTORE SERVICE

Isolate camera, power, network or recording issue; coordinate required EPIGRAL spares and site approvals.

05 | VERIFY WITH CUSTOMER

Test live view, recording, time and sample playback; confirm the affected service is restored.

06 | CLOSE & FOLLOW UP

Submit cause, action, parts and test record; obtain confirmation; track any remaining or repeat faults.

Preventive care | Monthly visibility, quarterly maintenance

Frequency / control	Maintenance activity and report record
MONTHLY HEALTH CHECK	Review CCTV / NVR status, storage health, recording capacity and representative playback. Submit the monthly health report to EPIGRAL.
QUARTERLY PM	Four scheduled maintenance visits per year: clean cameras / lenses, inspect outdoor junction boxes and camera network boxes, and submit a health-check report. Additional on-call visits are required for covered systems.
EACH SERVICE VISIT	Verify hardware including HDD / NVR operation; check the affected camera / connection path; record restored live stream, recording and playback tests.
CONTROLLED CONFIGURATION	Support firmware updates if required and authorised camera unlocking. Obtain customer approval, preserve configuration and retest after any change.
REPORT CONTENT	Record visit date, location / asset, observations, diagnostics, corrective action, customer-provided spares, functional tests, pending items and responsible owner.
FOLLOW-UP & RESPONSE	Track complaint timestamps, response, onsite attendance and service closure. The PO sets response / attendance commitments; it does not provide a fixed restoration-time SLA or measured uptime.

Response commitments are contractual targets, not a claim of achieved performance. Agree priority definitions, contact hours and updates with the plant owner.

Customer care | Clear responsibility at every handoff

CUSTOMER & LOCATION

EPIGRAL Limited
CH/1 and CH/2, GIDC Industrial Estate
Dahej, Taluka Vagra, Bharuch
Gujarat 392130.
PO 4506125434 | AMC 2026-2027.

D-TECH RESPONSIBILITY

Inspection, cleaning, fault diagnosis, remote / onsite support, CCTV software assistance, authorised firmware support, service reports and verification of restored operation.

EPIGRAL SUPPORTING RESPONSIBILITIES

Provide work approvals, spares / materials, ladders / scaffolding / lifts and maintenance downtime. Customer scope also includes electrical / civil / fabrication work, client-PC maintenance and operator activity for viewing / export. D-TECH follows site security and safety requirements.
