

CASE STUDY / DELL LATITUDE • TOUCH DISPLAY • WORKPLACE TECHNOLOGY

Business laptops. Touch-enabled work. One supply partner.

Netafim Irrigation India Pvt. Ltd.

Dell Latitude 3480 laptops and a P2418HT touch monitor, brought together through two documented purchase orders for Netafim's Manjusr / Savli workplace.

NETAFIM | MANJUSAR / SAVLI

5**DELL LATITUDE LAPTOPS**

4 Core i3 + 1 Core i7

1**P2418HT TOUCH MONITOR**

Dell 24-inch class display

2**PURCHASE ORDERS**

Both dated 30 December 2017

Historical procurement case study | Ordered quantities and configurations from the supplied POs.

The requirement | Business mobility and touch interaction

Netafim's orders bring two workplace requirements into one procurement story: portable Dell Latitude laptops for business users and a Dell touch monitor for an interactive desktop workspace. The laptop order contains two configuration tiers, allowing the client to distinguish the standard business specification from the higher-specification unit.

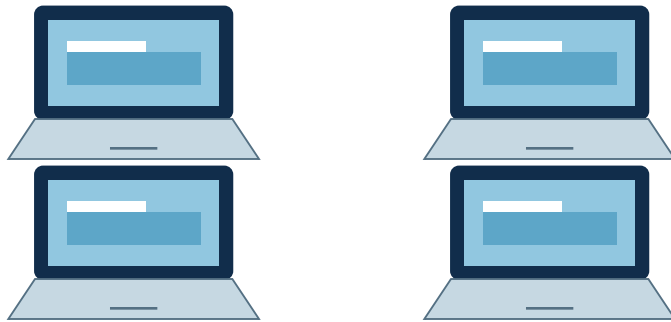

Equipment / quantity	Configuration recorded in the PO	Order reference
4 × Dell Latitude 3480	Core i3-7100U; 4GB DDR4; 256GB M.2 SATA SSD; 14-inch FHD; Windows 10 Pro; 3-year onsite + ADP + battery terms.	2900256650
1 × Dell Latitude 3480	Core i7-7500U; 8GB RAM; 1TB storage; 14-inch FHD; Windows 10 Pro; backlit keyboard; 2GB graphics; 3 years + AD stated.	2900256650
1 × Dell P2418HT	24-inch class Dell touch monitor, described as an LED panel in the order.	2900256652
4 separate backpack lines	Four separately priced backpack items. The i7 configuration also mentions a backpack; packed accessories need reconciliation.	2900256650

The i7 description also appears under a backpack line; it is counted once as a laptop, using the separate laptop item. Three-year service terms are historical order terms, not a statement of current warranty coverage.

Solution view | Portable users and an interactive workspace

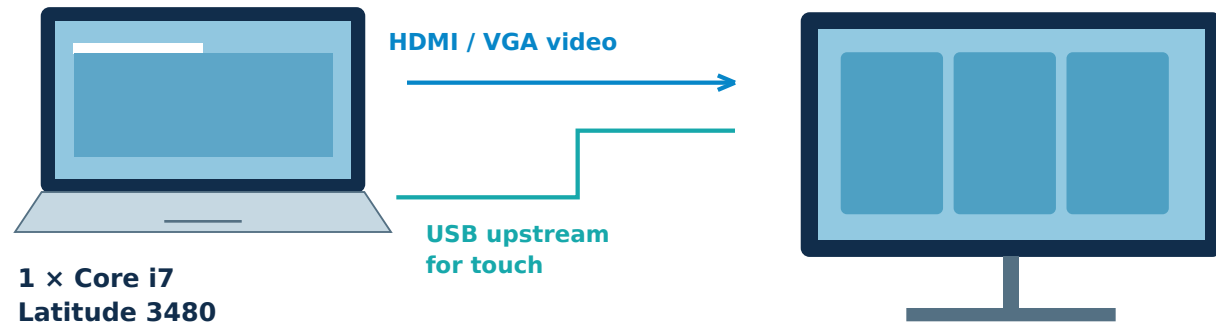

The artwork explains the two equipment roles. User allocation and the laptop paired with the touch monitor are illustrative.

STANDARD BUSINESS TIER

4 × Core i3 Latitude 3480

HIGHER-SPECIFICATION + TOUCH WORKSPACE

**1 × Core i7
Latitude 3480**

**1 × P2418HT
Touch monitor**

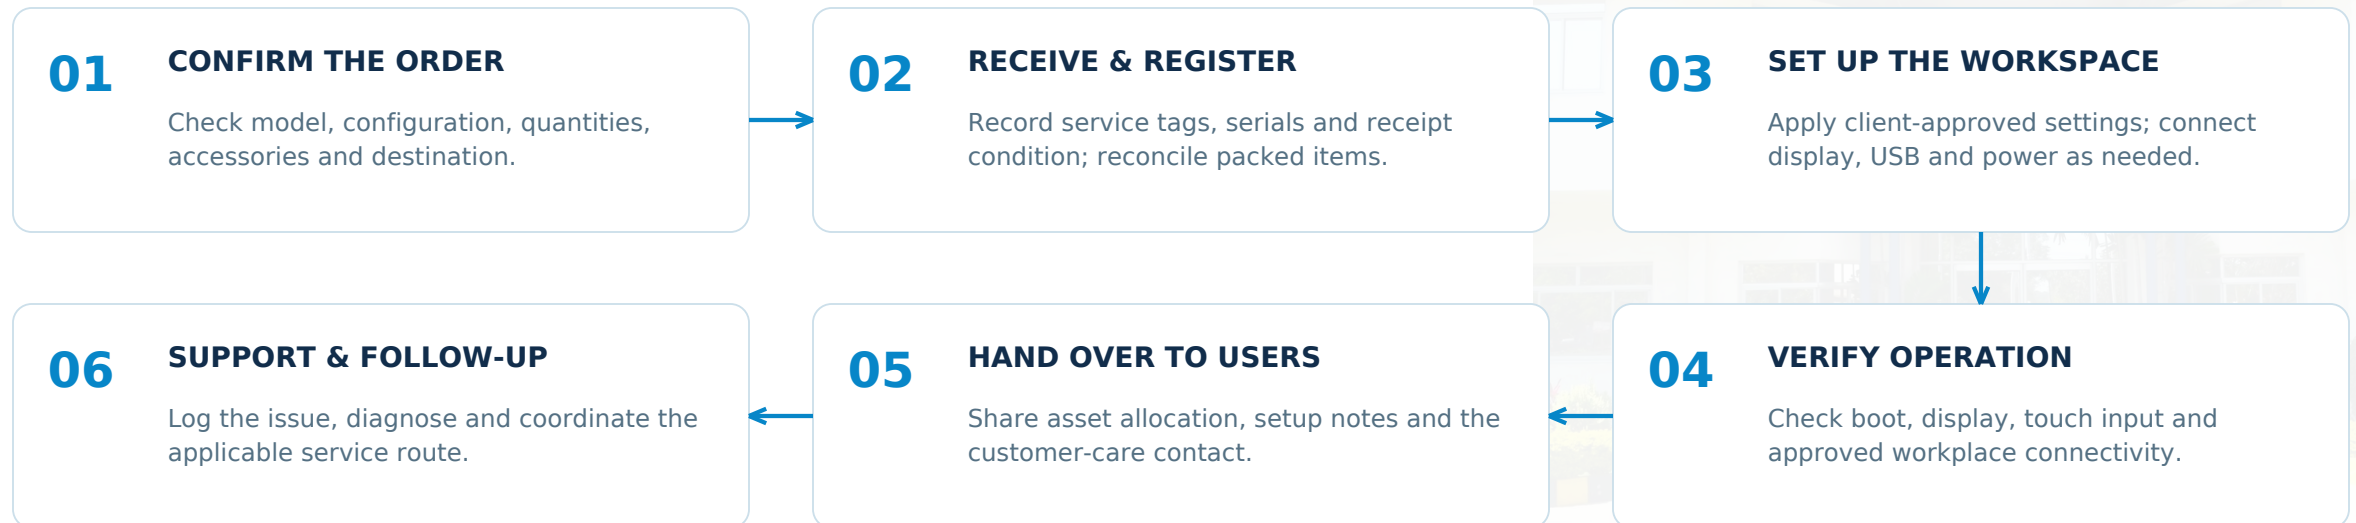

Connection principle

A video cable carries the picture; the monitor's USB upstream connection carries touch / USB communication to the computer. Both devices need their own power connection. Select an available matching video interface and validate touch mapping on the approved workstation.

Delivery to support | A clear operating process

Equipment delivery should lead to a clear asset record and an understandable support route. The flow below presents the coordination model for receiving the ordered hardware, completing an approved setup and handing the workplace over to its users.

The POs document equipment procurement. This setup and support workflow is a reference for client understanding; delivery acceptance, installation completion and measured support results are not supplied in these orders.
