The requirement | Consistency across locations

One framework for distributed IT requirements

An eight-plant network and Head Office need a dependable way to request approved IT materials, coordinate deliveries and obtain supply-related support. D-TECH describes its Aarti engagement as an ARC-based supply relationship serving these locations, with a total reported engagement value of approximately US\$25,954.

Client requirement	D-TECH delivery approach
Approved procurement framework	Use the agreed material catalogue and contract terms as the reference for each approved requirement.
Location-wise fulfilment	Confirm the receiving plant or Head Office, quantities and delivery instructions before dispatch.
Supply and delivery coordination	Coordinate sourcing, dispatch documentation, receipt and follow-up through a common supplier route.
Support after supply	Provide a contact point for delivery queries, product-related issues and applicable warranty coordination.

Inside this case study: [supply-to-support process - page 3](#) | [client value, accountability and source notes - page 4](#)

The process | From approved request to support

Clear responsibility at every hand-off

The same coordination model serves the eight plants and Head Office. Each release should retain its location, approved quantity, dispatch reference and receipt status so procurement and site teams can follow the request through to closure.

Process shown is D-TECH's engagement operating model. Location-specific delivery records and measured service times are not reproduced in this case study.

The value | A consistent supply and support route

A COMMON SUPPLY ROUTE

One supplier coordination point for the reported eight-plant and Head Office footprint.

APPROVED ARC COVERAGE

101 unique catalogue entries form the reference scope in the supplied agreements.

LOCATION-WISE DELIVERY

Receiving-site details and approved quantities guide fulfilment and receipt follow-up.

SUPPORT AFTER SUPPLY

A clear contact route connects delivery queries, product issues and applicable warranty assistance.

Engagement basis

The case study uses D-TECH-reported coverage and total business value. Reference agreements 5200007327 (BRD1) and 5200007325 (DHJ1) were dated 01 October 2020 and valid 08 October 2020-30 September 2021. Both contain the same 101-entry catalogue; entries are counted once. The agreements do not state fulfilled-unit quantities.

USD basis: INR 96.325 per US\$1, 02 October 2026 (Investing.com historical USD/INR). Converted value is rounded and is for presentation, not a settlement rate. The reported total is broader engagement value, not the sum of the two reference agreement targets.
