

BANKING INFRASTRUCTURE / CASE STUDY 01

Nine years of delivery. A network built on trust.

Baroda Gujarat Gramin Bank

Dell systems, NAS storage and peripherals.
Rate-contract supply, installation and continuing support across Gujarat.

334+

Branches served

800+

Dell systems supplied

9 YEARS

Relationship & support

Cumulative engagement figures supplied by D-TECH.

The requirement | Consistent IT across branches

One banking network. Multiple technology needs.

A distributed branch network needs dependable equipment procurement, coordinated installation and a clear support route. BGGB's supplied purchase orders cover commercial desktops, high-configuration systems, NAS storage and printers, with installation, commissioning and warranty provisions.

D-TECH's role

D-TECH reports a nine-year relationship with the bank, serving 334+ branches and supplying more than 800 Dell systems cumulatively. Repeat orders show an ongoing engagement spanning computer supply, storage requirements and service coordination.

Inside this case study	Page
Solution portfolio and delivery scope	3
Supply-to-support process	4

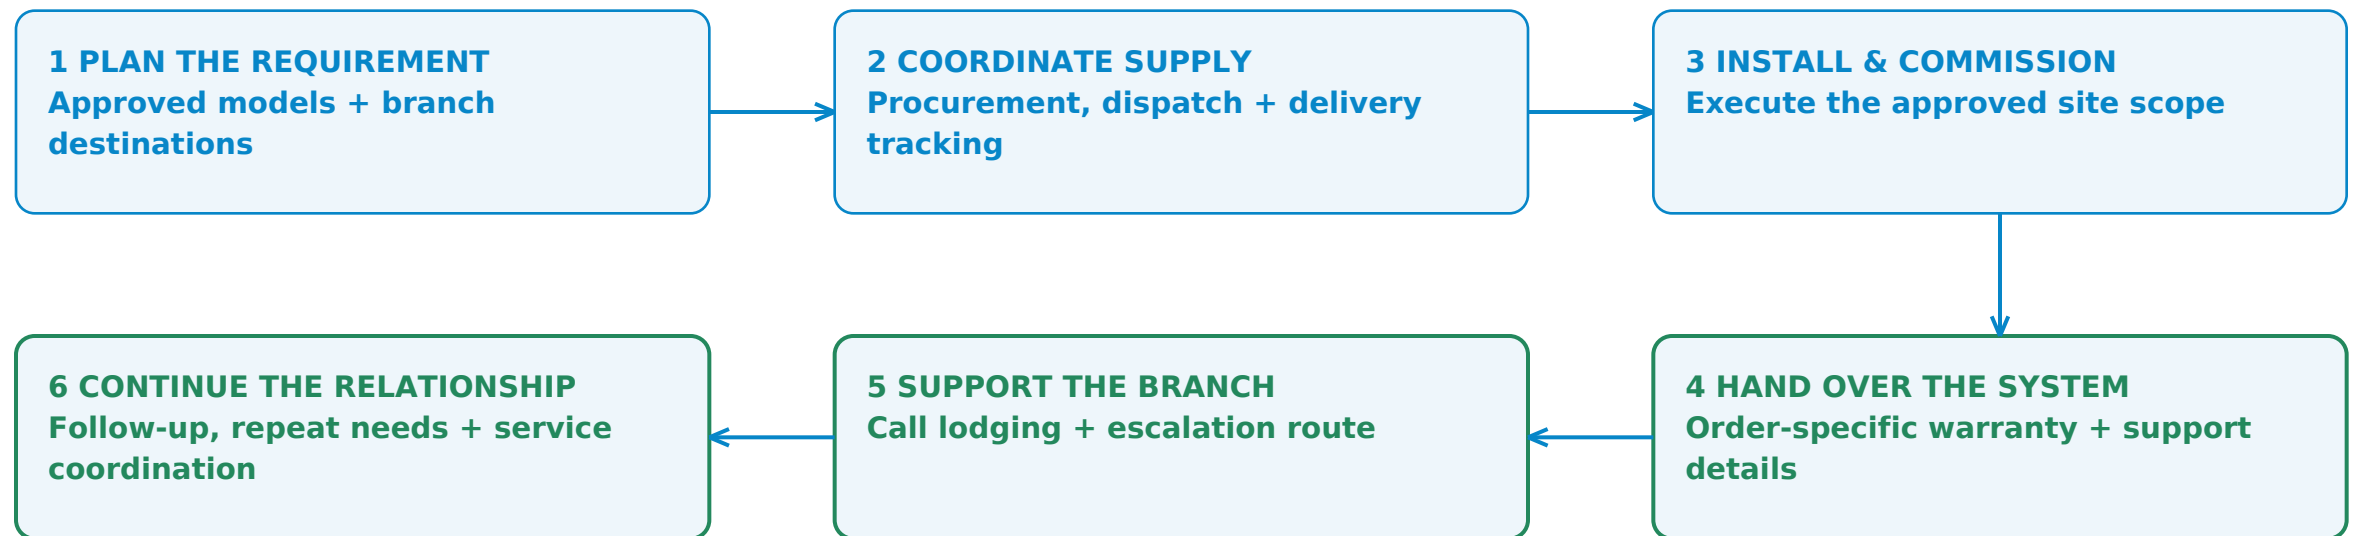

The solution | Supply, deploy and support

Solution	Scope	Client purpose
Dell desktop systems	OptiPlex 3050 Micro, 3070 Micro Tower and 5050 MT in the selected POs.	Desktop procurement across branch and office requirements.
NAS storage	9 NETGEAR RN424 units: 8 × 4TB and 1 × 8TB in the November 2019 PO.	Storage equipment delivered within the IT supply engagement.
Printers / peripherals	13 HP 1020 LaserJet printers in the December 2017 PO.	Peripheral supply alongside commercial systems.
Installation & commissioning	Included in the purchase-order scope and rate-contract references.	Coordinate equipment delivery with site deployment.
Warranty & support	Five-year warranty provisions; several POs specify onsite next-business-day comprehensive warranty.	An order-specific service route and escalation process.

The selected POs evidence ordered equipment and scope. Nine years describes the wider relationship; individual equipment warranty terms remain order-specific.

DELIVERY AND SERVICE MODEL

The process | From requirement to branch support

A service route for distributed users

The supplied POs request a call-lodging process and escalation matrix for circulation to branches and offices. This operating model links approved procurement, deployment and continuing support through one delivery relationship.
