

Dell systems. Coordinated deployment. A clear support route.

Rishi FIBC Solutions Pvt. Ltd. | Ranu works

D-TECH presents a supply, installation and support engagement built around a documented 35-system Dell desktop order for the client’s Ranu facility in Vadodara.

Dell desktop systems ordered

3020 MICRO

Dell model in the purchase order

3 YEARS

Onsite hardware warranty in PO

Reference: PO 15-08/01920, dated 13 July 2015. Installation and support are described from D-TECH’s stated engagement scope; completion records and service metrics were not supplied.

The requirement | A consistent workplace platform

The client requirement

Rishi FIBC Solutions Pvt. Ltd. placed an order with Dtech Computers for 35 Dell 3020 Micro desktop computer systems at its Ranu works. The compact system, monitor and mounting arrangement specified in the PO provide a consistent hardware baseline for deployment. The order includes a three-year onsite hardware warranty.

Scope	Client understanding
Supply	35 Dell 3020 Micro systems; part number CAD006X320833IN8. PO configuration: Intel i3-4160T, 4GB RAM, 500GB storage, Ubuntu, 18.5-inch display and AIO mount stand.
Installation	D-TECH-stated scope: coordinate site readiness, assemble and connect systems, apply approved settings and complete functional checks before handover. Exact application and network settings require client confirmation.
Support	D-TECH-stated scope: receive user issues, perform initial diagnosis and coordinate applicable hardware warranty service. The three-year term is the historical PO warranty, not a current renewal.

Inside this case study: deployment and support process - page 3 | handover, client details and source basis - page 4

The process | Supply to deployment and support

A clear division of responsibility

The client confirms user allocation, approved access and application requirements. D-TECH coordinates equipment supply, installation checks and issue handling. Hardware faults follow the applicable warranty route; software changes and additional services need an agreed scope.

Illustrative engagement workflow. The source PO confirms the order and warranty; it does not certify installation completion or measured support performance.

The handover | Accountability beyond delivery

CONSISTENT SYSTEM BASELINE

35 systems share the configuration specified in the reference order, providing a common basis for deployment and troubleshooting.

CONTROLLED HANDOVER

Record system serial numbers, allocation, installation checks and client acknowledgement for each deployed unit.

CLEAR SUPPORT CONTACT

Capture the asset reference, symptoms and user contact, then track diagnosis, escalation and closure.

APPLICABLE WARRANTY ROUTE

The July 2015 order includes three years of onsite hardware warranty. Current support coverage must be confirmed separately.
