PROJECT CASE STUDY | AWARDED SCOPE & DELIVERY ARCHITECTURE

D-TECH ENTERPRISE

DOCUMENTED PROGRAMME

A coordinated technology portfolio across four operating locations.

The 2026 orders combine branch enablement, a major first-floor infrastructure build, mobility deployment and a new-office transition.

35 Apple mobility devices

One programme, four business needs

Standardised engineering, OEM-led design and location-specific execution - coordinated through one D-TECH delivery layer.

FROM PATHWAY TO PLATFORM

An end-to-end stack designed around physical resilience, high-speed access and operational manageability.

CORE DESIGN PRINCIPLES

10G

UPLINK READY

PoE+

EDGE POWER

OM4

FIBRE BACKBONE

5 YR

OEM SUPPORT

High-technical brand alignment

Each layer is assigned to a technology specialist, keeping the solution supportable from rack and cable through switching, wireless and edge systems.

THE PROGRAMME ANCHOR

A quantified first-floor infrastructure build for WAGO assembly operations.

The scope integrates racks, structured cabling, fibre, switching, Wi-Fi, CCTV, PA and complete installation services.

22U RACKS

2

Netrack floor-mount

NETWORK POINTS

46

Cat 6A / Cat 7

LAN SWITCHES

4

Ruckus ICX 8200

WI-FI 7 APS

2

Extreme AP4020

NETWORK & FIBRE

- Up to 4,000 m Cat 7 cable activity documented in installation scope
- 600 m OM4 multimode fibre plus 150 m single-mode fibre
- Four loaded LIUs for OM4 and two for single-mode connectivity
- Four switch installations with 10G optics and direct-attach links

FACILITY EDGE

- One Matrix 5 MP IR dome camera with analytics and PoE
- 300 m perforated cable tray with mounting accessories
- 300 m HDPE, 250 m conduit and 100 m flexible route material
- Five ceiling and five wall speakers with 250 m speaker cable

Installation scope includes laying, mounting, dressing, punching, tagging, splicing, configuration, testing and associated fabrication.

ONE STANDARD, ADAPTED BY SITE

A hub-and-spoke programme balancing common governance with local business priorities.

Programme governance

Central design control, common OEM standards, location-wise logistics, installation ownership and consistent documentation create a repeatable rollout model for future sites.

HIGH-TECHNICAL BRANDS, INTEGRATED AS ONE SOLUTION.

The project portfolio combines category leaders across infrastructure, networking, wireless, surveillance, collaboration and mobility.

OPTICS

10GBASE-SR optical transceivers

HONEYWELL

AUDIO

Ceiling and wall PA speakers

APPLE

END-USER DEVICES

iPhone enterprise mobility

PHOENIX CONTACT

FIELD TERMINATION

Industrial RJ45 connectivity

The value is not the brand list alone.

It is the engineering that makes these platforms interoperable, supportable and ready for site operations.

A REPEATABLE EXECUTION RHYTHM

From survey and design to testing and handover, every site follows visible control gates.

QUALITY CONTROLS

- ✓ OEM-aligned specifications
- ✓ Structured labeling and dressing
- ✓ Fibre splicing and test records
- ✓ Configuration and functional checks
- ✓ Location-wise acceptance
- ✓ As-built documentation

Outcome framework

A consistent, documented and scalable technology foundation intended to improve connectivity, user readiness, manageability and future expansion across WAGO locations.

WHAT THIS PORTFOLIO DEMONSTRATES ABOUT D-TECH.

A reference-ready model for customers planning multi-site offices, plants, assembly areas and technology transitions.

MULTI-SITE CONTROL

Coordinate four locations without losing local execution detail.

FULL-STACK ENGINEERING

Unify pathway, passive, active, wireless, edge and mobility.

BRAND-AGNOSTIC INTEGRATION

Select specialist platforms and make them work as one system.

QUANTIFIED DELIVERY

Build around measurable points, lengths, devices and test gates.
