CASE STUDY / TWO SITES / ONSITE FMS & COMPREHENSIVE AMC

Two sites. One coordinated IT support model.

GACL-NALCO Alkalies & Chemicals Private Limited

Dahej plant + Vadodara complex

Onsite engineers, user support, network care, backup administration and preventive maintenance under a documented service scope.

WO 3300000862 | 07 July 2025
Contract: 01 July 2025 - 30 June 2026

2 SITES
DAHEJ + VADODARA

3 ENGINEERS
2 DAHEJ + 1 VADODARA

CUSTOMER NEED / SERVICE CAPACITY / CLEAR LOCATION OWNERSHIP

Engagement | Dedicated support at both complexes

GNAL’s work order brings plant and office IT into one FMS and comprehensive AMC scope. The operating model combines site-based engineers with D-TECH escalation, preventive care, genuine or customer-approved spares and coordinated OEM support.

Site / function	Work-order staffing	Service focus
DAHEJ COMPLEX	2 engineers in general shift: 1 desktop engineer and 1 network engineer.	User devices, network operations, RF connectivity, hardware diagnosis and local support.
VADODARA COMPLEX	1 desktop engineer in general shift.	Office users, devices, mail / Microsoft 365 administration and storage / backup support.
D-TECH COORDINATION	Additional expertise as required; backup engineer during leave to maintain stipulated strength.	Specialist escalation, spares / standby coordination, OEM follow-up and service documentation.
ENGINEER PROFILE	Graduate in IT / ECE / Computer Science / Computer Application; minimum 3 years of relevant experience.	Hardware, software and networking competence; work under GNAL’s designated IT officials.

CASE STUDY MAP

03 Two-site service architecture | 04 Supported services | 05 Complaint resolution & maintenance | 06 Customer details & governance

Document basis: the supplied 2025-26 work order. The service model and commitments are described; measured outcomes or subsequent renewals were not supplied.

Service architecture | Local engineers, shared escalation

DAHEJ PLANT

Desktop engineer + network engineer
Local help desk, user devices, LAN / WAN, RF, firewall, Wi-Fi and server support.

D-TECH ESCALATION

Record site and impact, route specialist work, coordinate OEM / ISP and standby equipment, update the customer.

VADODARA COMPLEX

Desktop engineer
Local help desk, office users, mail / M365, hardware and QNAP storage support.

GNAL IT OWNER

Approve access, changes and priorities; direct engineers and validate service restoration.

SERVICE RECORDS

Asset register, ticket history, IP / port maps, backups, logs and maintenance evidence.

OEM / ISP / SPARES

Warranty fulfilment, covered repairs, replacement / standby and external-link coordination.

This is a service-responsibility diagram. It does not assert an installed inter-site WAN, shared tenant or specific network topology.

Scope | User, network and infrastructure operations

Service area	Work-order coverage and operational tasks
USER / MAIL / M365	User and mail-data management; approved account changes; backup administration; Office 365 Business Basic, Teams and OneDrive licence / console management.
ENDPOINTS / SOFTWARE	Desktop and laptop troubleshooting; OS / application installation, data transfer and antivirus installation, updates and licence management. SAP client and VPN installation / connectivity.
NETWORK OPERATIONS	LAN / WAN / Wi-Fi / internet monitoring; switch, router, firewall and RF device configuration; VLAN / IP management; updated port-wise diagrams and configuration backups.
STORAGE / BACKUP	QNAP TVS-882 storage is listed for Vadodara. User-data backup, connectivity and new-user management; maintain approved backup schedules and check recovery readiness.
HARDWARE / AMC	Covered PCs, printers, UPS, switches, storage and related devices per site annexures; breakdown repair, preventive maintenance, genuine / approved equivalent spares and warranty follow-up.
EXCLUSIONS	Printer ink / toner cartridges, laptop batteries, plastic body parts and other consumable accessories are excluded by the work order. Apply the agreed asset register and contract wording.

Listed examples include HP / Lenovo PCs, HP printers, Arrow UPS, D-Link switches, Sophos firewall, access points and Ubiquiti RF devices. Reconcile live inventory.

SERVICE FLOW / CONTRACTUAL TIMING / CUSTOMER VALIDATION

Resolution | Complaint handling and maintenance discipline

01 LOG
Site, asset, impact and symptom.

→

02 DIAGNOSE
Onsite checks and safe workaround.

→

03 RESTORE
Repair, spares, standby or escalation.

→

04 VERIFY
Customer test and closure evidence.

Control	Work-order commitment / operating evidence
FAULT RESTORATION	Complaints to be resolved within 48 hours. Track receipt, action, escalation, restoration and customer confirmation timestamps. These are commitments, not measured results.
PARTS / STANDBY	Faulty parts to be changed / replaced within 24 hours, otherwise standby material provided. A separate clause requires standby where repair is likely to exceed 48 hours; retain both obligations.
PREVENTIVE CARE	PC preventive maintenance quarterly; printers as required. Inspect hardware, software status, cabling / rack labels and configuration-backup records.
SPARE READINESS	Standby list: printers 1 Dahej + 1 Vadodara; L2 switches 2 Dahej; desktops 2 Dahej + 1 Vadodara. Maintain tools, movement and return records.

Suggested evidence: ticket register, repair / standby log, PM checklist and monthly review. Actual SLA achievement data was not supplied.

Coverage & governance | The customer support route

Location / provision	Work-order schedule
DAHEJ	8-hour, 7-day coverage. General shift stated as 07:30-16:15. One engineer present on Saturday, Sunday and GNAL-declared holidays.
VADODARA	General shift stated as 08:30-17:30. Help-desk clause: 8 hours x 6 days, except Sunday, 2nd / 4th Saturday and GNAL-declared holidays.
EXTENDED SUPPORT	Emergency extended-hours / holiday support as required. The order also states 8x6 onsite and 24x7 "offline" support; confirm the roster and meaning of offline support with GNAL.
SERVICE GOVERNANCE	Maintain engineer strength and leave replacement; work under GNAL IT direction; keep asset inventory, LAN / WAN diagrams, IP records, device backups and monthly performance logs.
